Double Barrel Carbine by Swinburne

A double barrel cavalry troopers carbine made by Swinburn & Sons, 1857. 21in twist iron barrels of reduced musket bore (0.733in). These carbines were issued to the Scinde Irregular Horse, probably the most famous regiment of irregular cavalry which fought on the Indian sub continent. As with many Indian guns this carbine has had a hard life and few carbines found on the market are in good condition.

Martini Henry Mk 1 Cavalry Carbine

De-activated Martini Henry Mk 1, cavalry carbine marked to the North Devon Yeomanry. This carbine will have originally been issued to a regular cavalry regiment. When the Martini Henry was superseded by the Lee Metford cavalry carbine they would have been issued to the Yeomanry replacing their Snider carbines.
